

A and A Game Engineering Stations Manned and Ready

Game data file for Japan - World War 2

This data file contains precalculated game data for ships of the above nation.

Each record shows the class name, ship type, and construction date, followed by the vessel's base game data in the same layout as that used in the rules.

This is followed by the armament, again in the same layout, though the presentation is slightly different.

The final section shows, on the left, the ships in the class, which may also show a date from, or until which that ship's values are valid.

In the right hand section you will find details of all the other equipment carried and used in the game. Note that there may be asterisks or other marks which cross reference between the ships on the left and the special data on the right. Again, ship specific equipment and values are shown. Most special game data is headed with a bullet point.

All information in this document is (c) A A Game Engineering and is for use with our rule sets. It may not be used for any other purpose without our express agreement.

Data for the following ship classes is included in this document

BB	Fuso (1941)
BB	Ise (1937)
BB	Nagato (1936)
